

ABRASIVE WHEELS

OVERVIEW

The dangers for people that operate abrasive wheels cutting equipment as part of their role cannot be underestimated. Many accidents that occur with abrasive wheels come about due to operator error or poor maintenance of equipment, both of which could be resolved with effective training and a heightened awareness of the dangers that using this equipment can pose.

This abrasive wheels e-learning course provides learners with all the information they need to effectively operate abrasive wheel equipment and help to ensure they avoid injury for themselves and those around them.

Please note: We recommend that this course is combined with an element of practical training.

OBJECTIVES

- Establish the different kinds of abrasive wheel equipment and how they are used
- Identifying the dangers when using abrasive wheels and making sure you have the right tool for the job
- Exploring different types of hazards when using abrasive wheels
- Following clear guidelines for use
- Understanding how to check, store and ensure safety of the wheel is not compromised
- Effective mounting of equipment
- Using guards and PPE effectively with abrasive wheels
- Identifying the specific safety elements to consider for portable equipment

DURATION

60 Minutes including interactions and videos.

AUDIENCE

These Abrasive Wheels e-learning course materials are intended for use by people that want to make e-learning an additional part of their learning and development offering.

CERTIFICATION

Upon completion of the course the learner will receive a CPD certificate.
