

# DECISION MAKING

## OVERVIEW

## OBJECTIVES

Will I mess it up? What if I'm wrong? Will people think I'm an idiot? Making decisions is difficult. And there are many reasons we fail to make good decisions. We might over-think or over-complicate an issue. We may take too long to reach a conclusion and we're often struck with a terrible fear of making mistakes.

- Have a systematic approach to making decisions
- Make smarter, more informed decisions
- Learn how to make decisions faster and with more confidence
- Be better able to overcome indecisiveness
- Have a method of justifying decisions to others

This e-learning course will help learners solve this problem. Learners will be encouraged to make smarter, more timely and more thoughtful decisions. The content provides a systematic approach that help us make decisions easily and with more confidence. When we take the time to follow a logical decision making process, we are often amazed at the results we can achieve.

### DURATION

1 hour. Including video, interaction and downloads.

### AUDIENCE

The tools and techniques your users will learn are useful life skills, regardless of their job or life situation. We could all benefit from making informed and carefully considered decisions.

### CERTIFICATION

Upon completion of the course the learner will receive a CPD certificate.
