

ENVIRONMENTAL AWARENESS

OVERVIEW

Environmental awareness means having an understanding how the things we do impact the environment. And how, by making changes to the things we do, and the way we do them, we can help protect the environment we live and work in.

Environmental awareness covers a number of areas such as environmental health, sustainable development, biodiversity and climate change. This e-learning course sets out to provide learners with a core understanding of these topics, together with the skills and knowledge they need to effectively ensure they are doing all in their control to improve environmental health in the workplace.

The e-learning course will help ensure they comply with the Environmental Health Act, but further than that, it will help raise their consciousness of environmental issues while at work.

OBJECTIVES

- Learn the importance of environmental awareness at work and in our lives
- Understand the reasons for creating an environmentally aware workplace
- Establish how to reduce waste and potential pollution
- Explain how to deal with environmental emergencies when they occur
- Explore real life examples that help bring the learning to life.

DURATION

1 hour. Including interactions and videos.

AUDIENCE

This course is aimed at everyone in a business.

CERTIFICATION

Upon completion of the course the learner will receive a CPD certificate.
