

GDPR FOR MANAGERS

OVERVIEW

OBJECTIVES

Data protection regulations apply to processing carried out by organisations operating within the EU, and also to organisations outside the EU which offer goods or services to individuals in the EU.

Although everyone within an organisation should be aware of and follow the GDPR regulations, people in more senior roles have an important role to play. This requires an in-depth understanding of the data regulations and the ability to identify where breaches may be taking place and to help ensure any gaps are closed.

This e-learning course provides the learner with an in-depth understanding of GDPR, giving clarity around what is needed to ensure compliance, as well as providing support material to guide the organisation through the compliance process.

With this online learning, your learners will be taken through the regulations step-by-step, ensuring they have a full understanding of what is required.

- Ensure organisational compliance with the General Data Protection Regulation (GDPR)
- Ensure personal compliance with the GDPR
- Improve general compliance within your organisation
- Help to develop a compliance culture within your organisation
- Help your company avoid potentially costly litigation and fines

DURATION

40 minutes. Including interactions and downloads.

AUDIENCE

This course is aimed at senior people within an organisation who must both, comply with, and ensure others comply with data regulations.

CERTIFICATION

Upon completion of the course the learner will receive a CPD certificate.
