

# SCRUM

## OVERVIEW

Scrum – Scrum provides a framework for helping teams work together effectively, address complex issues and work towards well-defined goals. It's based on the three pillars of transparency, inspection, and adaptation and the idea that knowledge comes from experience and making decisions based on what is known. Put simply, Scrum is an effective way to manage projects and develop solutions.

This Scrum e-learning course sets out to provide learners with all the skills and knowledge they need to effectively develop, deliver and sustain complex project processes.

## OBJECTIVES

- Build the skills required to effectively work within the Scrum framework
- Understand the different roles in the Scrum process and how to implement them
- Explore Scrum processes and how to apply them to projects

### DURATION

20 minutes. Including interactions and videos.

### AUDIENCE

Although predominantly aimed at leaders and managers, this course could suit people in a variety of roles.

### CERTIFICATION

Upon completion of the course the learner will receive a CPD certificate.
